Friday 27th February 2026

Dear Parents and Carers,

This term, Year 4 pupils will be preparing for the statutory Multiplication Tables Check (MTC), which all children in England complete during the summer term (during June).

The purpose of the check is to ensure pupils can recall multiplication facts from 1 x 1 all the way up to 12 × 12 quickly and accurately. A solid knowledge of times tables supports confidence and fluency and times tables knowledge is used constantly in a variety of mathematical ways such as:

The MTC assessment consists of 25 questions and pupils will have six seconds to answer each one. It is completed in school using a Chromebook. Pupils have been working towards this all year in a low stakes way with lots of support and encouragement from Miss Gray.

To help build confidence and fluency, we wanted to let you know about the URBrainy platform. This online resource provides practice in a format similar to the official check, allowing children to become comfortable with both the timing and structure of the questions.

You can support your child at home by encouraging short, regular practice of times tables. Little and often really makes a difference. Practising in a calm and positive way will help build both speed and confidence. Your child will also come home with a printed times tables support visual which can be used at home to support understanding.

Children also have access to TT Rock Stars to support their learning at home. If you need your child's login details again, please let us know and we will resend them. TT Rock Stars also provides printable worksheets, so paper copies can be made available for children who do not have access to a device at home.

Please reassure your child that this is not something to worry about – it simply helps us understand how best to support them as they move into Upper Key Stage 2.

If you have any questions or would like further guidance on supporting times tables practice at home, please feel free to get in touch.

Many thanks for your ongoing support.

Kind regards,

Charlotte Gray	Ellen Hedge	Claire Pateman
